
Appendix B: Other UBPR Products and Ordering Information

In addition to the individual bank UBPR, the FFIEC makes available other reports, and data tapes derived from UBPR data. These items are:

Peer Group Report

This report (approximately 400 pages) compiles the peer group ratio averages from all 25 peer groups, that are prepared for presentation in UBPR's. The items in this report have the same definitions as those given in Section III, and the items are grouped as they are in the UBPR. Information is grouped by peer group in a format similar to the UBPR, with 5 quarters of information displayed. In addition, the Peer Group Report includes national averages for the same set of ratios. This report is produced quarterly, for the same data dates as the UBPR, and includes 10 pages per peer group.

Peer Group Distribution Report

This report is (approximately 400 pages) contains ten data values ranging from the 1st through the 99th percentiles for each ratio for the current reporting period report. This report is produced quarterly, for the same data dates as the UBPR, and includes 10 pages per peer group. The format is similar to the UBPR.

State Averages Report

This report (approximately 75 pages) presents a single-page set of summary ratios for each State. The items are generally the same as those presented on the UBPR "Summary Ratios" page, plus three more ratios on non-current loans and leases. Each States page presents statewide ratio averages for

five dates, plus averages for three asset-size groups in the State for the latest date. A page of national averages is also presented. This report is produced quarterly.

State Average Distribution Report

This report (approximately 300 pages) contains ten data values ranging from the 1st through the 99th percentiles for each ratio for the current reporting period only. The format is similar to the State Average Report.

UBPR Data Tapes

The data items presented in UBPR's peer group reports and state average reports are available in bulk format on magnetic tape. These tapes may be of use to requestors who wish to select or analyze data for large numbers of banks or peer groups. A typical UBPR edition would include a maximum of 17 tapes: eight unique tapes for bank data, eight unique tapes for bank rank data, and one tape for peer group and state average data. UBPR tapes will be available only for the current edition.

The types of UBPR data that will be available on tape are:

- R1—Bank-level ratio and dollar values:

Each tape will contain a record for each insured commercial bank for one data date. Each record will contain approximately 700 ratio or dollar values.

- R2—Peer group averages:

Each tape will contain a record for each of the 25 UBPR peer groups plus a record for all banks, for all of

the data dates for that edition. Each record will contain approximately 330 average ratio values.

- R3—Bank percentile ranks:

Each tape will contain a record for each insured commercial bank for one data date. Each record will contain approximately 330 percentile rank values.

- R4 and R5—State and state/asset group averages:

Each tape will contain a record for each state plus a record for all banks. The same tape will also contain a record for each of three asset size groups in each state, plus a record for all banks in each of these asset sizes (\$0–25 million, \$25–100 million and over \$100 million); these size group records are present only for the latest data date for the edition. Each record will contain approximately 33 ratio averages, plus total assets and total net income.

All of the above items, as well as individual bank UBPRs, are available for purchase by the general public.

General Information

The Uniform Bank Performance Report (UBPR) is an analytical tool created for bank supervisory purposes. In a concise format, it shows the impact of management decisions and economic conditions on a bank's performance and balance-sheet composition and is produced for each insured commercial bank and FDIC insured savings bank (Insured Bank) in the United States. The UBPR is computer-generated from the FDIC data base, contains several years worth of data, and the data is presented in ratio, percentage, and dollar formats.

Average Report

(approximately 310 pages) Contains ten pages of ratio averages for each UBPR Peer Group as well as national averages. This report follows the same format as the bank report and presents five periods of data.

Distribution Report

(approximately 390 pages) Contains ten data values ranging from the 1st through the 99th percentiles for each ratio for the current reporting period only.

State Average Data

Consists of the State Average Report and the State Average Distribution Report. These reports contain Summary Ratio data (in the same format as Page 1 of the Bank Report) for the nation and each individual state.

Commercial and FDIC insured savings banks data are not commingled.

- *Average Report*—(approximately 75 pages) this report follows the same format as the bank report and presents five periods of data.
- *Distribution Report*—(approximately 300 pages) contains ten data values ranging from the 1st through the 99th percentiles for each ratio for the current reporting period only.

User's Guide for the UBPR

(approximately 100 pages) Documents the Bank Report. The User's Guide includes:

- General and technical UBPR information
- A sample of each UBPR page and a description of each line item
- A worksheet for calculating tax-equivalency adjustment.

Public Disclosure Tapes

Data printed on the Bank Report hard copies are available on tape in bulk format for all banks, peer groups and state averages. These tapes may be of use to requestors who wish to select or analyze data for large numbers of banks or peer groups. A typical UBPR edition would include a maximum of 17 tapes: eight unique tapes for bank data, eight unique tapes for bank rank data, and one tape for peer group and state average data. For ordering call:

John Smullen, FFIEC
202-634-6526

Data Formats

The typical UBPR format consists of the following:

- *Year-End*—Five consecutive year-end periods (e.g., December 1992 through December 1996).
- *Non-Year End*—Current period, one-year ago from the current

period, and three year-end periods (e.g., June 1996, June 1995, December 1996, December 1995 and December 1994).

Data Types

The typical UBPR Publication presents three types of data for each of five periods:

Bank-Level Ratio and Dollar Values

The source of all bank financial data in all of the UBPR publications is the FFIEC Call Reports, which are filed on a calendar quarter basis.

Peer Group Averages

The UBPR system classifies insured commercial banks into 25 unique Peer Groups and FDIC insured savings banks into four unique Peer Groups to show how a group of banks with similar characteristics has performed (both groups have national figures). This information can be used as a bench mark to asses an individual bank's asset and liability structure, earnings level and off-balance sheet exposure.

Bank Percentile Ranks

Based on the UBPR Peer Groups, the UBPR system ranks each bank ratio within each Peer Group in an ascending order. The resulting percentile rank, ranging from 0 to 99, provides the user an institution's relative position within it's UBPR peer group for each measure.

UBPR Data Availability

Each quarter, approximately 90 days after the Call Report date, each Insured Bank will automatically receive a copy of its own UBPR Bank Report free of charge. If you have misplaced your bank's UBPR Bank Report an additional copy maybe purchased (through the FDIC Disclosure Group). In addition, you may also purchase the Bank Report on your competitors or any other UBPR product by using the order form in this guide.
